THE FRAUD ISSUE

Parts two and three of our “Reducing Fraud” blog series are now available on [our blog](#). As you may remember, we started off this series because of a fraud case in a church in the midwest. With the second and third posts, we highlight some ways to reduce the risk of fraud happening in your ministry.

One of Miller Management’s favorite tools to share is [the Fraud Triangle](#), which we discuss in part two. And in part three, we outline the importance of [Administrative Audits](#).

THE HAPPENINGS

ACS CONVERSION

This summer we were able to complete our software transition to Accounting CS. We are excited about the opportunities this software will open up to our clients. After the hard work that went into the conversion process, we thought it a great reason to celebrate. See this [Facebook post](#) about that day.

30TH ANNIVERSARY

On our 30th page, you will find things like our mission, our people, and visual timelines of our company over the years. More items will be posted throughout the year and we invite you to join us on this journey.

VERSE OF THE MONTH

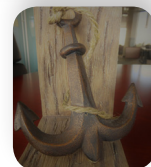

Colossians 3:23

"Work willingly at whatever you do, as though you were working for the Lord rather than for people."

CAPTAIN'S CORNER

Worldwide fraud in ministry is estimated to hit 60 billion dollars this year. What if we reduced ministry fraud by 10, 20 or even 50%? That would equate to 6, 12 or up to 30 BILLION dollars to feed the hungry, build new churches and spread the gospel to the ends of the earth."
