HOW TO READ AND UNDERSTAND YOUR FINANCIAL STATEMENTS

Having accurate and timely financial statements is essential for every ministry. How to read and understand those statements is just as important. This 90 minute course will walk you through the basics of accounting, the three financial statements your ministry needs to have and understand, and then you will learn about how to utilize that information to help your ministry make informed decisions. An eBook and online course are provided in your \$30 per person ticket price.

CREATING AN EFFECTIVE AND EFFICIENT OFFERING COUNTING SYSTEM

This is one of our most popular classes because every ministry needs a counting system that is organized and is accountable. This course will provide a roadmap to setting up an effective and efficient counting system complete with procedures, forms, and all the necessary components needed to be successful. An eBook and two hour online course are provided in your \$30 per person ticket price.

MISSION DRIVEN BUDGETING

This two hour course will provide the foundation for taking your current budget process to a mission driven, annual goal setting process that aligns all of your ministry resources directly to your mission. This annual process will increase teamwork and communication and decrease politics. The goal is to align all your resources to more effectively meet your mission. An eBook and online course are provided with your \$80 per person ticket price.

BUILDING TRUST AND CREDIBILITY THROUGH FINANCIAL INTEGRITY

With world wide ministry fraud topping 80 billion dollars, (yes, that is a B as in billions) it's time we take financial integrity more seriously. This course will illuminate the issues of fraud in ministry, why fraud happens in churches, provide best practices that will significantly reduce the opportunity of fraud, and in turn, help build trust and credibility with your constituents. An eBook and two hour online course are provided in your \$45 organization pass, for up to three individuals.
